Target version:			
Resolution:		**Affected version:**	

Description

I want to add "required" permission to my custom field for specific role and tracker. I'm selecting only related role and tracker to do it but it doesn't work. Field permissions table showing my "required" selection after saving process but this field is not showing as "required" with red "*" symbol on issue page.

If I select all roles on "field permissions" table, it works. But I don't want to add "required" permission to all roles.

```
Environment:
  Redmine version                3.0.7.stable
  Ruby version                   2.3.1-p112 (2016-04-26) [x86_64-linux]
  Rails version                  4.2.3
  Environment                    production
  Database adapter               Mysql2
SCM:
  Git                            1.8.3.1
  Filesystem
```

History

#1 - 2017-06-06 20:47 - Toshi MARUYAMA

- Category set to Custom fields

- Status changed from New to Needs feedback

I cannot reproduce on 3.3.3.
