<b>Target version:</b>	0.8.1		

#### Description

Hi, in our company we commonly link from Redmine issues to documents on our Lotus Notes servers.

These links look like this:

```
"Notes":Notes:///4125749A0018C13D/42FC5416F4D71EB04925749E0021CF19/A5352E3CC7379C3B49159538003D1A6B
```

or this:

```
"Notes":Notes://homeserver/4125749A0018C13D/42FC5416F4D71EB04925749E0021CF19/A5352E3CC7379C3B49159538003D1A6B
```

That worked very well till revision r2212. Afterward, due to the stricter checking, the text was shown as entered, not rendered as hyperlink anymore.

Attached patch re-enables support for rendering of Lotus Notes links.

I would appreciate if you could apply the patch (or let me know your concerns if not).

Thanks for this great software!

Environment:

- mysql Ver 14.12 Distrib 5.0.51a, for redhat-linux-gnu (i386)
- ruby 1.8.6 (2008-03-03 patchlevel 114) [i386-linux]
- rails 2.1.2
- redmine revision 2316

#### Associated revisions

##### Revision 2344 - 2009-01-31 15:50 - Jean-Philippe Lang

Less strict textile links parsing (#2582).

#### History

##### #1 - 2009-01-31 15:46 - Jean-Philippe Lang

- Status changed from *New* to *Resolved*
- Target version set to *0.8.1*

Fixed in r2344. Any [a-zA-Z]+:// is now allowed.

#2 - 2009-02-09 19:47 - Jean-Philippe Lang

- Status changed from Resolved to Closed

Merged in 0.8 branch in r2425.
