Description

Here is a patch with five new view hooks that I found useful. Maybe they can be included in the official version.

The 2nd hook in custom_fields/_form.rhtml is actually four hooks (one hook for each type of custom field: for example view_custom_fields_form_user_custom_field).

```
app/views/custom_fields/_form.rhtml:
  * [ 67] :view_custom_fields_form_upper_box, :custom_field => @custom_field, :form => f)
  * [ 97] :"view_custom_fields_form_#{@custom_field.type.to_s.underscore}", :custom_field => @custom_field, :form => f)

app/views/issue_statuses/_form.rhtml:
  * [ 14] :view_issue_statuses_form, :issue_status => @issue_status)

app/views/my/account.rhtml:
  * [ 22] :view_my_account, :user => @user, :form => f)

app/views/users/_form.rhtml:
  * [ 16] :view_users_form, :user => @user, :form => f)
```

- File more_hooks.diff added

I have added two more hooks:

```
app/controllers/custom_fields_controller.rb:
  * [ 38] :controller_custom_fields_new_after_save, :params => params, :custom_field => @custom_field)
  * [ 48] :controller_custom_fields_edit_after_save, :params => params, :custom_field => @custom_field)
```

- File issues_show_desc_bottom_hook.diff added

I don't know if this is the right place, but I've added a hook that I find useful, too -- it's after the description on the show issues page. I'd appreciate it if

it could be made 'official'.
