

Redmine - Feature #26045

Does API REST show fields added by plugins?

Description Hello! I want to get a field added in the issue by a plugin using API REST, but i have noticed that although the field is in the Redmine database, it isn't showed by the XML/JSON. Is there some way to get field added by a plugin using API REST or Have I to get it of the database? Thank you!

It currently doesn't, but there's a patch to enable the hooks required for this: [#15986](#)
