

Redmine - Defect #26058

Cannot create Plugin Tables in Development Environment

2017-05-29 13:13 - Bitaseme M

Status:	Closed	Start date:	
Priority:	Normal	Due date:

Target version:		Affected version:	
Resolution:	Invalid		
<b>Description</b> Following the plugin tutorial <a href="#">Plugin Tutorial</a>  I tried creating a plugin and when I get to the step that creates the database table, all the console says is migrating. When I go look at the development database I do not see the plugin table.  I hope this can be fixed as it seems unusual that I cannot test my full redmine environment in development mode. I like development due to all the detailed logging I get in the console on every action.

It wasn't a question. To my knowledge, it is a defect. However I have posted in the forum as you requested.
