Description

Currently the default assignee is set only after validations. This means that when the field is required the default assignee does not work.

The following patch changes setting the default assignee to before the validation:

```

I can reproduce the problem as follows.
I confirmed that the problem is reproducible and can be fixed by the pasted patch.

New issue

⚠ • Assignee cannot be blank

3. A new issue should be created but actually we see this error.

Thank you for confirming this.

Please be aware that this also affects the newly introduced project default assignee, i.e. if an assignee is required and the project has a default assignee the issue will not be created.

Maybe it would be better to make this more explicit by change the "assignee" field to the default project assignee on new issues, and by changing the assignee when changing the category if the assignee wasn't changed yet.

Agreed, it would be an interesting improvement.
