Description

I noticed a difference between the rendering of the query filter forms on the issues & spent time views and the query filter forms on the calendar and gantt views. I fixed it with the following changes:

- 1. **Fix HTML structure of form#query_form on calendar/gantt views.**
This unifies the HTML structure of the query form on the calendars/show and gantts/show views to be the same as it is currently for the issues and spent time views, which were themselves unified into the new queries/_query_form partial in [r15649](#).
- 2. **Fix source indentation and newline usage.**
This unifies the source layout of the query form on the calendars/show and the gantts/show views with the queries/_query_form partial.
- 3. **Unify form#query_form structure on calendar/gantt views.**
This:
 - moves the p with inline style on the calendar view (which wraps the navigation buttons) out of div#query_form_content and adds the contextual class to the element to unify this with the gantt view (and to remove the inline style from the element now that it's styled through a stylesheets' style [.contextual in fact]);
 - restores the 12px font-size of the calendar navigation buttons;
 - increases the font-size of the gantt zoom buttons to 12px;
 - increases the margin of the calendar navigation and gantt zoom buttons to 12px 0px.
- 4. **Add test assertions to the four controller test cases.**

To make the changes a bit more visual, here some ASCII and image graphics:

#2 - 2017-06-19 04:55 - Go MAEDA

- Target version set to 4.1.0

Looks good to me. Passed all test.
Since we are freezing 3.4.0 now and this issue is a kind of refactoring, I think it would be better to set target version to 3.5.0 instead of 3.4.0.

#3 - 2017-06-25 17:17 - Jean-Philippe Lang

- Status changed from New to Closed
- Assignee set to Jean-Philippe Lang

Patches are committed, thanks!
