Target version:	4.0.0		
Description			
Hi,			
In the IssuesHelper#details_to_strings method (source:trunk/app/helpers/issues_helper.rb@16387#L373) a new class (Struct) is created each time the method is called:			
<pre>multiple_values_detail = Struct.new(:property, :prop_key, :custom_field, :old_value, :value)</pre>			
Although classes are garbage collected in recent Ruby versions, it might be better to use a constant definition outside the method, like:			
<pre>MultipleValuesDetail = Struct.new(:property, :prop_key, :custom_field, :old_value, :value)</pre>			
Regards, Thomas

- Category changed from Performance to Code cleanup/refactoring

#2 - 2017-06-10 05:52 - Go MAEDA

- Description updated

#3 - 2017-06-25 21:24 - Jean-Philippe Lang

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

- Target version set to 4.0.0

Change committed, thanks.

#4 - 2017-06-26 05:54 - Toshi MARUYAMA

- Description updated

#5 - 2017-06-26 05:55 - Toshi MARUYAMA

- Target version changed from 4.0.0 to 4.1.0

I think target version should be version:3.5.0 because there is no 3.5-stable in Subversion.
