Redmine - Defect #2616
Target version-list on bulk edit form is incorrectly sorted

2009-01-28 23:36 - Mischa The Evil

Status:	Closed		Start date:	2009-01-28
Priority:	Normal		Due date:	
Assignee:			% Done:	0%
Category:	UI		Estimated time:	0.00 hour
Target version:	0.9.0			
Resolution:	Fixed		Affected version:	

Description

The list of issue target-verion options that is shown on the bulk edit form does not follow the regular sort-order (by date then by name) as seen e.g. on the versions project-settings page. Now it seems to be sorted by id.

Quick workaround (or definate fix after approval) would be to change source:trunk/app/views/issues/bulk_edit.rhtml#L30 from:

options_from_collection_for_select(@project.versions, :id, :name)) %></label>

to

options_from_collection_for_select(@project.versions.sort, :id, :name)) %></label>
