A local solution:

```
nano public/stylesheets/application.css
```

and add

```
#issue_description_and_toolbar .textoverlay-wrapper {width: 95%;}  
#issue_description_and_toolbar .textoverlay {width: 95%;}
```

History

#1 - 2017-06-25 13:23 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Invalid

This cannot be reproduced in 3.3 and .textoverlay CSS class is not defined in Redmine core. This might be related to the additional "smiley" button that can be seen on your screenshot.

#2 - 2017-06-26 17:13 - Konstantin Ladutenko

Yep, sorry. I had reinstalled emoji plugin, now it works as expected.
