

Redmine - Feature #26370

Get time entries for a specific issue

2017-07-06 11:05 - César DJ Caësar 9114

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	REST API	Estimated time:	0.00 hour
Target version:			
Resolution:	Invalid		
Description <p>For the moment, you have to make 2 different calls (time tracking API and issues API) to gather the time entries for a specific issue. Could it be possible to get the time entries for a specific issue with one or both these methods:</p> <ul style="list-style-type: none">• directly in issues/[ISSUE NUMBER].json, in the key "time_entries" (new key of the JSON)• in a new REST call, for example time_entries/issue/[ISSUE NUMBER].json, what would send back just the time entries and not the whole issue info. <p>Thank you! :)</p>

I don't think that's true. You can already retrieve the time entries of a specific issue with just one request: /time_entries.[format]?issue_id=~ID.

You're actually right.
My feature request can be closed and next time I'll think a bit more before posting!
Thank you, Mischa.
