

Redmine - Defect #2655

eMail notification breaks if email adress wrong

2009-02-03 14:28 - Piotr Szal

Status:	Closed	Start date:	2009-02-03
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:		Affected version:	0.7.3
Resolution:	Wont fix		
<b>Description</b> eMail notofocations are send itemize (one by one). If an eMail adress from an user is wrong and the server cant send, all next emails are not send.  We have a user with <a href="#">b...@xyz.de</a> in one project and because his email was wrong, no other user have become an email in this project.			

History

Same issue as [#123](#). Actually, email notifocations are **not** sent one by one but using a single email. That's why you've got this problem.

As mentionned in [#123](#), a solution would be to send an email for each user, which could be much slower.

#2 - 2009-04-24 19:39 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Wont fix
