Revision 17683 - 2018-12-02 15:15 - Go MAEDA

Change the text of the submit button on search page from button_submit to label_search (#26620).

Patch by Dmitry Lisichkin.

Revision 17684 - 2018-12-02 16:31 - Go MAEDA

Fix for r17683: s/button_search/label_search/ (#26620).

- Status changed from New to Needs feedback

Where is "button_search" defined?
"button_submit" is defined at source:trunk/config/locales/en.yml@16905#L1030 .

#2 - 2017-08-03 19:00 - Dmitry Lisichkin

Sorry, I didn't notice that button_search is not defined in core.
I just try to remove maximum of patches from our plugins=).
Problem that button_submit have translations that not always appropriate in some contexts.
In russian it translated as "Принять" and it looks very strange on search page but looks normal on most of other forms.
So I think was good if button_search would be in core too.

Do you think :button_search should be used in only app/views/search/index.html.erb?
In other word, other :button_submit should be kept?

#5 - 2017-09-02 05:46 - Toshi MARUYAMA

What do you think :button_search should be in English en.yml?

#6 - 2017-10-05 19:03 - Dmitry Lisichkin

Sorry for long response.
Yes I think button_search should be in en.yaml even with only one usage in view.
IMHO "search"-button on search form is much better then "submit"-button.

- File button_search.png added

- Status changed from Closed to Reopened

For me, this change generates "translation missing: en.button_search". Please see the below screenshot.

button_search.png
In the existing locales, we have only "label_search". We can use this one (my option) or we need to add the "button_search" to locales.

```
diff --git a/app/views/search/index.html.erb b/app/views/search/index.html.erb

Fixed in r17684. Thanks.

I changed button_search to label_search before committing as I wrote in the commit message, but probably I mistakenly reverted the local change and applied original patch again.
