Redmine - Feature #26639

Enabling creating issue within the project regarding the subproject

Description

Hey,

Im managing many projects, which do not have trackers as they are something general.
Under each project I have a lot of subprojects, in which I do have trackers for issues creation.
I would like to be able to create an issue straight from project (**without** accessing the subproject), but the issue **must be** related to specific subproject
Is it possible to create such option? I could not find any info regarding it.

Thanks

#2 - 2017-08-20 12:54 - Marius BĂLTEANU

- Status changed from New to Closed

- Resolution set to Duplicate

This feature is discussed in #12704 which has a patch also that adds the project dropdown on the new issue form when the project has subprojects.

I'm closing this issue with Resolution "Duplicate". If I'm wrong, please reopen.
