Description Hey, Im managing many projects, which do not have trackers as they are something general. Under each project I have a lot of subprojects, in which I do have trackers for issues creation. I would like to be able to create an issue straight from project (without accessing the subproject), but the issue must be related to specific subproject Is it possible to create such option? I could not find any info regarding it. Thanks

- Is duplicate of Feature #12704: Allow selecting subprojects on new issue form added
- #2 - 2017-08-20 12:54 - Marius BĂLTEANU
- Status changed from New to Closed
- Resolution set to Duplicate

This feature is discussed in [#12704](#) which has a patch also that adds the project dropdown on the new issue form when the project has subprojects.

I'm closing this issue with Resolution "Duplicate". If I'm wrong, please reopen.
