thanks :-)
I'll try to write an english version...

#2 - 2006-11-06 21:20 - Todd McGrath

An English (American: example color instead of colour) docbook file is ready for review at:

<http://www.supergloo.com/redmine/redmine-userdoc-en.xml>

I couldn't upload a file to this feature request, so that's why I put it on supergloo.com.

I couldn't find the xsl file used to convert to HTML in SVN?

Finally, some history information...
I paid a contractor to translate from French to English. Then, I went through the translation and made a few updates to make the language seem more natural. I hope this is OK with you Jean-Philippe and it helps RedMine community.

Great !!!
HTML are generated using "XMLmind XML Editor" builtin xsl. I'll had HTML files in SVN.
Thanks again.

Best regards,

Jean-Philippe
