

Redmine - Defect #26778

Wrong CSS class for themes if its name includes " _ " or " "

2017-08-28 16:20 - Go MAEDA

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Themes	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description The body element in HTML has CSS classes correspond to the current theme, project, controller and action. But "theme-*" class name is broken when the directory name of the theme includes " _ " or " ". Assume that you have installed a theme whose directory name is "foo_bar". Redmine will generate a class name "theme-Foo bar". But it is clearly broken because a whitespace is used as a separater. Here is an example. <body class="theme-Foo bar project-ecookbook controller-issues action-index avatars-off">
