

## Redmine - Patch #26819

### Create related issue button

2017-08-31 17:57 - Sandra Tatarevicova

<b>Status:</b>	New	<b>Start date:</b>

<b>Category:</b>	Issues	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			

#### Description

To create a related issue in Redmine, it is necessary to

- create the issue and
- link the issue to another issue

in two steps. This patch adds a button "Create related issue" to issue detail page. The button allows user to create an issue and add the issue relation (TYPE\_RELATES) in one step.

```

Hi Sandra,

I was keen to see this patch and hoping to be used in future releases. I am unable to apply the patch through Git Bash. Could you jot down the steps here? The command that I run was this

```
cd to redmine folder
patch -p0 < create_related_issue.patch
```

Any mistakes here? Comments would be appreciated.

- File `create_related_issue.patch` added

Hi Shreyas,

I have created the patch using git diff. The problem was that patch created by git diff contains a/ and b/ prefixes (by default). I have removed the prefixes, you should be able to apply the attached patch by `patch -p0` now. The original patch can be applied using git apply.
