Description

If you have some/many projects and have to add some/many users, setting the Roles (and maybe other permissions) is quite cumbersome, so I propose

- grid overviews, that you can set the all roles (like Manager, Developer, Reporter) per <u>Project</u> or per <u>User</u> with **one Submit/Save**.
- maybe it's better to provide <u>radio button</u> layout (rather than drop-down lists) for the roles
- checkboxes like <u>"apply change on all"</u> projects/users or "check/uncheck all" would be great
- maybe providing a <u>filter</u> for projects/users would be helpful
