Resolution: Invalid	

Description

I'm writing a redmine plugin using: IssueQuery where when I want to use :
myquery.add_filter("issue_id", "=", ["123", "124", "125"])
I got only the first issue.
finally i find the function:sql_for_issue_id_field

```
def sql_for_issue_id_field(field, operator, value)
  if operator == "="
    # accepts a comma separated list of ids
    ids = value.first.to_s.scan(/\d+/).map(&:to_i)
    if ids.present?
      "#{Issue.table_name}.id IN (#{ids.join(",")})"
    else
      "1=0"
    end
  else
    sql_for_field("id", operator, value, Issue.table_name, "id")
  end
end
```

I seems that the "first" is a error?

BTW: i'm new to ruby and redmine.

History

#1 - 2017-09-09 10:41 - jiangshan song

I changed "ids = value.first.to_s.scan(/\d+/).map(&:to_i)" to "ids = value.to_s.scan(/\d+/).map(&:to_i)"
it seems work.
