Description			
Not sure if this is just my installation, or if everyone's experiencing this.			
Inline view works fine, but switching to side-by-side mode causes NoMethodError (undefined method `join' for "appviewsschedules_calendar.html.erb":String).

#1 - 2009-02-07 21:07 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Fixed

You're right. But it's not specific to side by side display, it happens when changing display type (inline -> side by side or side by side -> inline). Yet another thing that was broken by URL changes in [r2317](#).

Fixed in [r2399](#).
