Redmine - Patch #2696

Add subcategory to category

2009-02-07 23:40 - Rob Elsner

Status:	New		**Start date:**	2009-02-07
Priority:	Normal		**Due date:**

Target version:				

Description

This patch contains 2 migrations to add a column to issues and a table called issue_subcategories. This will allow users to have Categories, and a subcategory grouping below that.

I have tried to add the necessary parts for English, and use similar names for category.

This was diff'd against svn trunk revision 2399.

Hi, Rob.
Is that going to be added in the next release?
