Regexp support for excluded mail attachments

Now that we have regexp support for mail body delimiters, it makes sense to allow regexp parsing for excluded attachment filenames as well.

The common case are email signatures including images. In many cases, the filenames include something like footer or signature, so regexes like the following proved to be quite useful for us at Planio:

```
smime.p7s,.+\.vcf,.*(footer|signature).*\.(gif|jpg|jpeg|png)
```

The attached patch series implements this feature.

Associated revisions

Revision 17225 - 2018-03-03 05:29 - Go MAEDA

Optional regexp for filtering attachments on incoming emails (#27025).

Patch by Jan Schulz-Hofen.

Revision 17226 - 2018-03-03 05:32 - Go MAEDA

Fix indent (#27025).

Patch by Jan Schulz-Hofen.

Revision 17227 - 2018-03-03 05:43 - Go MAEDA

Rename :setting_mail_handler_enable_regex_delimiters i18n string to :setting_mail_handler_enable_regex (#27025).

Patch by Jan Schulz-Hofen.
