Maybe we can grey-out the non working days using the same style like the days from other months? Something like that:

+1

I think it would be even better to use a different background color from dates of previous/next months.

Yes, it could be an option. Let me see what can I do.

Go Maeda, attached the patches that mark the non working days in the calendars from Projects and My Page. I didn't apply any style on the class because I didn't have any idea (apart from the same style as the one from days from other month). Please feel free to add a style to my patches.

Go Maeda, did you have the chance to look over this feature?

Marius, thank you for writing the patch.

It looks OK except one thing. Do you think it is OK that the class name for non-working days is different from gantt? Although gantt already uses "nwday", your patch uses "non-working".

For sure we should use the existing "nwday" class, but I didn't know about it. I've updated my second patch, thanks for pointing out.

**#11 - 2019-01-09 00:43 - Go MAEDA**

- Target version changed from Candidate for next major release to 4.1.0

Thank you for updating the patch, it looks good. Setting the target version to 4.1.0.

**#12 - 2019-01-14 06:24 - Go MAEDA**

- Status changed from New to Closed
- Resolution set to Fixed

Committed the patches. Thank you for improving Redmine.

And I have added a style for non-working days. The background color is the same with non-working days in gantt.

**#13 - 2019-01-14 06:24 - Go MAEDA**

- Subject changed from Mark (somehow) non-working days in calendar view to Mark non-working days in calendar view
