Target version:		Affected version:	3.3.2
Resolution:			

Description

Dear Redmine,

We have an issue with our current version of Redmine. We have about 50 different projects in our location installation, including some plugins:

Environment:

Redmine version

3.3.2.stable

Ruby version

2.1.2-p95 (2014-05-08) [x86_64-linux]

Rails version

4.2.7.1

Environment

production

Database adapter

Mysql2

SCM:

Subversion

1.8.11

Mercurial

1.4

Git

2.3.1

Filesystem

Redmine plugins:

plantuml_macro

0.0.1

redmine_wiki_extensions

0.7.0

redmine_wiki_lists

0.0.8

scrum

0.16.2

Since a day ago, we are having problems with our (sub)projects being re-arranged incorrectly in the breadcrumbs (top left corner) and the drop-down list for project selection in the top-right corner. Please see attached file [redmine-bug-breadcrumbs.png](#).

Even though in the settings page of "Project A" the information is correct (Project A is a subject of Projects, which is a subproject of Development), in the breadcrumbs and drop-down list it shows that Project A is subproject of Development.

It also seems that when we want to move one (sub)project to a different level, many other projects get "moved" unwanted. Is there some cache that needs to be cleared, or do we have some corrupted data in the database?

Thanks!

History

- Status changed from New to Needs feedback

Please describe more details.
What do you expect and result?

#2 - 2017-11-01 18:15 - Robin Corba

Let's say I have to following project structure in my Redmine installation:

Development > Projects > Project A

However in the breadcrumbs in the top left corner, and the drop-down list it is like this:

Development > Project A

So, I want to move 'Project A' to become the subproject of 'Projects' however when I change the parent project to 'Projects' Redmine will make the

parent project 'Development' again, which is on level too high.

In some cases, we have the following structure:

Development > Projects > Project B
Development > Project A
Finance

If I move Project A to become a child of Projects, for some reason Project B is moved to a different project (for example Finance):

Development > Projects > Project A
Finance > Project B

I think there is a bug in the project movement.

- Category deleted (UI)

Did you try bundle exec rails runner "Project.rebuild_tree!"?
