

Redmine - Defect #27126

Breadcrumbs and Drop-down List corrupted

2017-10-05 05:34 - Robin Corba

Status:	Needs feedback	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	3.3.2
Resolution:			
Description			
Dear Redmine,			
We have an issue with our current version of Redmine. We have about 50 different projects in our location installation, including some plugins:			
Environment:			
Redmine version	3.3.2.stable		
Ruby version	2.1.2-p95 (2014-05-08) [x86_64-linux]		
Rails version	4.2.7.1		
Environment	production		
Database adapter	Mysql2		
SCM:			
Subversion	1.8.11		
Mercurial	1.4		
Git	2.3.1		
Filesystem			
Redmine plugins:			
plantuml_macro	0.0.1		
redmine_wiki_extensions	0.7.0		
redmine_wiki_lists	0.0.8		
scrum	0.16.2		
Since a day ago, we are having problems with our (sub)projects being re-arranged incorrectly in the breadcrumbs (top left corner) and the drop-down list for project selection in the top-right corner. Please see attached file redmine-bug-breadcrumbs.png .			
Even though in the settings page of "Project A" the information is correct (Project A is a subject of Projects, which is a subproject of Development), in the breadcrumbs and drop-down list it shows that Project A is subproject of Development.			
It also seems that when we want to move one (sub)project to a different level, many other projects get "moved" unwanted. Is there some cache that needs to be cleared, or do we have some corrupted data in the database?			
Thanks!			

History

- Status changed from New to Needs feedback

Please describe more details.
What do you expect and result?

#2 - 2017-11-01 18:15 - Robin Corba

Let's say I have to following project structure in my Redmine installation:

Development > Projects > Project A

However in the breadcrumbs in the top left corner, and the drop-down list it is like this:

Development > Project A

So, I want to move 'Project A' to become the subproject of 'Projects' however when I change the parent project to 'Projects' Redmine will make the

parent project 'Development' again, which is on level too high.

In some cases, we have the following structure:

Development > Projects > Project B
Development > Project A
Finance

If I move Project A to become a child of Projects, for some reason Project B is moved to a different project (for example Finance):

Development > Projects > Project A
Finance > Project B

I think there is a bug in the project movement.

#3 - 2017-12-01 13:30 - Toshi MARUYAMA

- *Category deleted (UI)*

Did you try bundle exec rails runner "Project.rebuild_tree!"?
