Redmine - Patch #27212

When deleting the projects category, its name should be represented in the confirmation dialog.

Target version:				

Description

Now
When deleting a category from a table in redmine-url/projects/myproject/settings/categories an popup is triggered:

- Are you sure? [Ok | Cancle]

Expected
It would be nice if the name of category is named, to be sure that the right line of the cathegory was selected:

- Are you sure to remove <category-name>? [Ok | Cancle]

This could be werry handy on the large hdpi screens where category name and delete are far a way.
