

Redmine - Defect #27242

issue creation failed if email notification fail

2017-10-20 22:07 - Slim BENHAMMOUDA

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email notifications	Estimated time:	0.00 hour
Target version:		Affected version:	3.3.3
Resolution:	Invalid		
Description			
<p>Hello, I have a redmine instance installed on a vps:</p> <ul style="list-style-type: none">• redmine 3.3.3• mySQL• Apache+passenger <p>I created an issue, assigned it to a developer and saved the issue. the page keep loading and I finally received an internal error. I checked the redmine log file (production.log) and I found that there is an issue with mail notification. In fact, my email server was down during my issue creation, so redmine failed to send the email and a rollback occurred on my issue creation!!! Isn't this a strange behaviour, why issue creation should fail if notification email fails. For me, notification should be a separate module from issue tracking module!!! What do you think?</p> <p>Cheers, Slim</p>

Probably you can avoid the problem by switching `delivery_method` to `async_*`. Please see [EmailConfiguration](#) for the details.

#2 - 2017-10-21 09:26 - Go MAEDA

- Related to Feature #26791: Send individual notification mails per mail recipient added

#3 - 2017-10-21 09:26 - Go MAEDA

And it will be fixed if [#26791](#) is implemented because emails will always be sent in background.

- Status changed from New to Resolved

Many thanks,
I'm changing the issue status to resolved.

Cheers,
Slim

#5 - 2017-10-29 05:03 - Go MAEDA

- Status changed from Resolved to Closed

- Resolution set to Invalid

Thank you for the feedback. Closing.
