Redmine - Feature #2729

Memorize activity events selection

2009-02-12 14:12 - Erik Hellström

Description

A little annoyance that I found.

In the Activity page there's a list of filters (with checkboxes) to the right. It would be great if the filter settings can be saved during my session. As it is now, I change the filters and when moving to another page and then back to the activity page again the filters is reseted to the default values (being Issues, Changesets, News, Documents and Files active.)

Just a minor thing but I suppose it's a quick fix?

I'm running Redmine 0.8.0.devel.2415

That's not a defect. This is simply not saved in session.

I'd rather call this a defect :) We use the forums feature extensively on our Redmine deployment. I would like to keep coming back to the "activity" page and seeing what new has happened, and its quite painful that Redmine does not store my settings for "messages" checkbox. So each time its an extra click and a press-button.

I also need this fix, and wondered that it was not implemented yet.
