Description

Working here:

- https://redmine.mydomain.com/time_entries - spent time details
- https://redmine.mydomain.com/time_entries/report - spent time report

When saving Report (not Details) as a custom query, Spent Time Details is actually saved - when i open the link, available in right column, Spent Time Detail is opened.
It would be really good to be able to save also Spent Time Reports, coz we're using it as a timesheets.
