I cannot reproduce on my CentOS 7.

Do you use Windows?

It seems Nokogori switches requiring Ruby version by OS.

I cannot install Redmine 3.4.3 in following configuration

```

```

```
E:\data\redmine>cmd /version
Microsoft Windows [Version 10.0.14393]
```

Ruby is installed from <https://github.com/oneclick/rubyinstaller2/releases/download/rubyinstaller-2.4.2-2/rubyinstaller-2.4.2-2-x86.exe> (the link from <https://rubyinstaller.org/downloads/>).

Gemfile:

```
gem "nokogiri", (RUBY_VERSION >= "2.1" ? "~> 1.7.2" : "~> 1.6.8")
```

P.S. After changing Gemfile: `gem "nokogiri", (RUBY_VERSION >= "2.1" ? "~> 1.7.2" : "~> 1.6.8")`
to `gem "nokogiri", (RUBY_VERSION >= "2.1" ? ">= 1.7.2" : "~> 1.6.8")`
the installation proceeded with installation 1.8.1.
