Redmine - Defect #2754

Setting up the default_url_options :port in hook will duplicate with the host parameter(which already contains port param) in settings

2009-02-15 05:37 - Chaoqun Zou

Status:	Closed		**Start date:**	2009-02-15
Priority:	Normal		**Due date:**	
Assignee:	Eric Davis		**% Done:**	0%
Category:	Plugin API		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Cant reproduce		**Affected version:**	

Description

By r2429, the plugin hook will setting up the default_url_options :host, :port, and :protocol.

But in the setting page, the host parameter is designed to contain port, so the two port will duplicated. Now I can see them duplicated in mails.

For example:

- Send test mail in the setting page
- The issue' url in the notification mail

Chaoqun Zou, I'm not see this bug at all. Can you attach the source emails and what values you have in your "Host name and path" and "Protocol"?

Attached my own testing results.

#3 - 2009-02-21 01:32 - Eric Davis

- Status changed from New to Closed

I did some refactoring to this area of code in r2489, r2490, and r2491 so this should be resolved. Please reopen the issue if you can provide some sample emails for me to reproduce.
