

## Redmine - Defect #27546

### Wiki PDF export of .png images not working properly

2017-11-16 15:11 - Mauro Condarelli

<b>Status:</b>	Closed	<b>Start date:</b>	
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>		<b>Affected version:</b>	3.4.2
<b>Resolution:</b>	Invalid		
<b>Description</b>			
<p>I am running a reasonably current version of Redmine under Centos7</p> <p>!Screenshot from 2017-11-16 14-22-08.png!</p> <p>I have several images in my wiki pages that are either .png files included with the "sort form" (!image.png!) or .svg generated from plantuml plugin.</p> <p>Neither is displayed correctly in exported .PDF files.</p> <p>I attach an example of the generated document (this one doesn't even have embedded plantuml graphs).</p> <p>Is there any hope to quickly find the problem? (I urgently need to send these pages for offline viewing)</p> <p>TiA</p>
