**Description**

May be i oversight something, but on the features list there is not a word about sub project feature of Redmine.
As far as i know currently Redmine supports at least one sublevel in projects (#594).
Of course we have to update the Redmine Guide as well.
We have to update the Project settings area too.

**History**

**#1 - 2009-02-15 21:35 - Karl Heinz Marbaise**

added some text into the features list page.

**#2 - 2009-11-23 14:35 - Mischa The Evil**

- Subject changed from Subproject Support to Subproject Support Documentation

- Category changed from Wiki to Documentation

- Assignee set to Mischa The Evil

After completion of #594 Redmine supports unlimited nested projects. This indeed should be documented more detailed.

**#3 - 2009-11-23 14:35 - Mischa The Evil**

- Tracker changed from Defect to Feature

**#4 - 2010-01-11 18:34 - Tom Rochette**

RedmineProjectSettings already contains a bit of information about pre/post 0.9.0. Is more required?

**#5 - 2013-05-07 08:30 - Jean-Baptiste Barth**

- Status changed from New to Closed

- Assignee deleted (Mischa The Evil)

- Resolution set to Fixed

Now covered in current docs, I close the issue. Thanks.
