Redmine - Feature #27604

Computed Custom field lacks documentation

2017-11-21 18:22 - Steven Wade

Status:	Closed		**Start date:**

Category:	Documentation		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid			

Description

The computed custom field looks like a great addition to Redmine but none of the existing Custom Field documentation describes how to use it. In addition, if I select a custom field from the list it gives you and hit submit I get the following error:

•Formula is invalid
•can't dup NilClass

History

#1 - 2017-11-22 01:26 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Invalid

Probably you are talking about a third party plugin. Please contact the author of the plugin because it is not a part of Redmine core.
