

Redmine - Defect #27636

Redmine does not redirect to initial project page after bulk editing issues in different sub-projects.

2017-11-24 12:43 - Stephane Evr

Status:	Closed	Start date:	
Priority:	Normal	Due date:

Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	3.4.2
Resolution:	Duplicate		
Description After bulk editing 2 issues which are located in 2 different sub-projects of the current project, we are being redirected to the general issues page instead of being redirected to the initial project where the bulk edit occurred. Steps to Reproduce: <ul style="list-style-type: none">• Build this hierarchy: <pre>Project A - Project A1 - Issue 1 - Project A2 - Issue 2</pre>• Navigate to /projects/project_a/issues page• Select Issues 1 and 2• Right click• Bulk edit• Add a note• Save• Expected: Save is successful, we are redirected back to /projects/project_a/issues page• Actual: Save is successful, we are redirected back to /issues page
