

Redmine - Defect #2766

Login back_url changes https to http

2009-02-17 12:04 - Benjamin Dieckmann

Status: Closed	Start date: 2009-02-17
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	Affected version:
Resolution: Invalid	

Description

When opening an URL with <https://...>, and the user needs to log in first, the url is changed to <http://...> even if the protocol is set to https. This happens directly within the login URL ('login?back_url=http://..').

Tested with 0.8.0 and the new 0.8.1.

Anyway it would be nice if redmine could always redirect to the specified protocol, so that people using http and https is set are automatically redirected to the https-address.

History

- Status changed from New to Resolved

Not a redmine issue.

<http://www.redmine.org/wiki/redmine/FAQ#Why-does-Redmine-use-http-links-when-I-want-it-to-use-https-links-in-Apache-SSL>

#2 - 2010-07-11 19:05 - Jean-Baptiste Barth

- Status changed from Resolved to Closed

- Resolution set to Invalid

I close this one since it doesn't seem to be a redmine issue, but more a hosting one.
