Description

As we talked about in the discussion forum, please add mailing list support, with the ability to search mailing list archives.

Thanks,

Dan

I would add that looking at how Roundup (a python based issue
tracker) deals with emails/mailing lists could provide some
interesting contrast to how they usually work.

http://roundup.sourceforge.net/

#2 - 2008-06-21 02:47 - Kit Plummer

I know there a branch for the mailing_list stuff. Just curious what the state is...and if you need to someone to work it.

#3 - 2008-06-21 11:47 - Paul Rivier

Also look at the Debian bug tracking system, if you plan to implement this. http://www.debian.org/Bugs/
GNUEmacs just started to use it as well, so fresh newcomers experience can be found on emacs-devel mailing list archive.
I also enjoy email integration in BTS, but I know it is a really non-trivial issue. MANY things can be learned from existing systems.

Daniel Lopez: please link to the forum thread you'ra talking about.

#4 - 2008-09-24 12:26 - Thomas Capricelli

Hello, for the record:

branch :
http://www.redmine.org/repositories/browse/redmine/branches/work/mailing_lists

and i guess the forum thread is.. (?)
