Description

I want the function to display only the tickets that arrived on the due date on the calendar (URL and button designation)

In large-scale project management,
A large amount of tickets today with start date / due date are displayed on the calendar.

Managers want to check the processing situation for today / near-term deadline tickets.

In this case, I do not want to display the start date. That is not important.

Do you mean a feature like this?

Thanks for your comment.

That's right.

It is good to be able to select the start date and the due date separately.
