Description	
<p>Hi,</p> <p>often I copy issues across versions. My issues have a lot of subtasks.</p> <p>It would be useful if when I set, for example, version or status on parent issue the same are set on the subtasks.</p> <p>Without this I must modify them afterwards, and this is not always easy.</p> <p>Regards</p> <p>Alessandro</p>
