Redmine - Defect #27902

Overview page is very slow for private projects with large number of members

2018-01-05 17:24 - simon butcher

Target version:			
Resolution:		**Affected version:**	

Description

I have over 2000 members in a non-public project. Hence, these members get shown on the overview page. This makes the display of the overview page take around 3-4seconds.

```
..
  Rendered projects/_members_box.html.erb (579.5ms)
  Rendered projects/show.html.erb within layouts/base (596.2ms)
...
Completed 200 OK in 3430ms (Views: 622.8ms | ActiveRecord: 37.4ms)
```

```
Environment:
  Redmine version                3.4.3.stable
  Ruby version                   1.9.3-p484 (2013-11-22) [x86_64-linux]
  Rails version                  4.2.8
  Environment                    production
  Database adapter               Mysql2
SCM:
  Subversion                     1.8.8
  Git                            1.9.1
  Filesystem
Redmine plugins:
  redmine_agile                  1.4.5
  redmine_contacts               4.1.1
  redmine_contacts_helpdesk      3.0.9
```

(I also tried with ruby 2.1.5 but that was the same.). The group has 2222 members which get shown on the members list on the overview page, with no option to turn this listing off.

+1

In the case of a large-scale environment, it seems that you should set the access authority on a group basis, and display it by the group name unit.

I used LotusNotes before Redmine,

In the access right setting screen of LotusNotes, it was displayed in the group definition unit used for the ACL setting.

+1

We are using it as a helpdesk, with huge number of issues, totally blocks system and uses much resources!
