Target version:			
Resolution:	Invalid	**Affected version:**	

Description

Hello,

My redmine production.log file is grown more than 1GB;

Can I simply rename the redmine/htdocs/log/production.log to another name ? Will the production.log file created automatically?

Any other suggestions?

My redmine response is getting slower recently; resource utilization is very low; I feel redmine may be taking more time in updating this log file;

Thanks and Regards
-/Raja G

- Resolution set to Invalid

Maybe the log rotation configuration described in <u>RedmineInstall</u> will help you.
