<b>Category:</b>	Time tracking	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b> Hi,  I am a redmine Scrum Master and am carrying multiple instances to obtain reports via the Project Management Tool. It would be really beneficial for the Project Manager if I recommend the below point to incorporate into redmine.  If we could map the 'Estimated Hrs/ % done' for a Tracker in 'Spent Time Details Section' wouldn't it reduce the cumbersome time to generate excel reports where I need to exclusively do a VLOOKUP to map the Estimated Hrs vs Spent Time for a particular Task? or %Done vs Spent Time against a particular task? It will give a great amount of Insight in terms of Time value being invested into a Project or against any task on a daily basis.
