Could you tell me the reason for changing the translation for "Link" from "Enlace" to "Ligazón"?

According to Google translate, both two words means "link". Unfortunately, I don't understand Galician language so I cannot understand the difference between "Enlace" and "Ligazón".

Hi,

both words exist in galician, and are similar:

- [Ligazón](#)
- [Enlace](#)

but for direct translation of "link" only *ligazón* is correct. In fact, *ligazón* is used in [galician locale's file](#) (only *ligazón* appears)

Enlace is the correct word in spanish.

Thank you for clarifying that. I have understood that the change is appropriate.

- Subject changed from Galician translation (jstoolbar-gl.js) to Change Galician translation for "Underline" and "Wiki link" (jstoolbar-gl.js)
- Target version set to 4.0.0

I have created #27994 for translation update of "Highlighted code". The following patch only contains translation changes.
