

Redmine - Defect #28034

Can assign closed/locked versions to custom field

2018-01-22 10:54 - Robert Schneider

Status:	New	Start date:

Category:	Custom fields	Estimated time:	0.00 hour
Target version:		Affected version:	3.4.2
Resolution:			
Description			
Detected in version 3.4.2.			
If I create a ticket with a tracker that has a custom field of type version (trying to realize "Affected version") I can assign all versions, regardless of their state. Now, I've got the same problem as it is described in #8572 .			
Project is a subproject. It has a list of versions that are not shared. The parent has also non-shared versions, which are correctly not listed.			
As it seems the same problem exists on redmine.org in the defect tracker as well.
