Description

If you upload files to the files area you have to choose the version to which the uploaded files will be associated to so it would be nice to have a link to the particular version from the files list area if you would like to know further details about a particular download.

Hi,
i have observed a little side effect of this change. It will do some indent of the commit message on the repository browser display...!IdentionError.jpg!.
It seemed to be the

```
tr.file td { text-align: center; }
```

in the **application.css** which is causing the problem.
