History

#1 - 2018-01-30 09:29 - Go MAEDA

- Subject changed from Found mistype in lt.yml to Fix typo in Lithuanian translation for label_version_sharing_tree
- Category changed from I18n to Translations
- Target version set to 3.3.7

"su" in Lithuanian language means "with" and the word "su" is also used in label_version_sharing_tree (en: "With subprojects", lt: "Su sub-projektais") and label_version_sharing_hierarchy (en: "With project hierarchy", lt: "Su projekto hierarchija"). In addition, I couldn't find the word "WiSu" in Lithuanian

dictionaries.

I don't understand Lithuanian language, but from the above, I am certain that the fix is correct. I am setting target version to 3.3.7.
