

Redmine - Feature #28126

Up to now, I cannot get the allowed file extensions when using the rest-API

Description

It should be possible to get the list of allowed extensions via the XML/REST-API
Otherwise, it's impossible to check if the filetype is allowed when I create an external upload-form.

```
SELECT
id
,name
,value
,updated_on
FROM settings
WHERE name = 'attachment_extensions_allowed'
```
