Redmine - Patch #28169

Enable and add underline button to the toolbar for Markdown formatting

Description
Textile formatting has the "Underline" option for text formatting and I find it useful to have it also for Markdown. The attached patch implements this. As a side note, until this patch, the '_' was an alternative to '*' (italic), but I don't think that many users were aware by this alternative because Redmine uses the '*' in help docs and in the generated markup by Italic button.

Updated the patch to apply cleanly after r17198. It'll be nice to deliver this feature along with #28119.

I agree. I don't see any reason why it shouldn't be possible.
