Description Can you add more visible element to edit the description of new task? When I already created a new task and I want to edit it, I need to enter in edit mode, then I need to find a description field and finally then push the pencil. It's very hard to notice from the first time. Can you make it more user friendly? Just add a little pencil right form the description of the task it will be very handy. Thx. Best regards

History

#1 - 2018-02-17 03:01 - Mischa The Evil

- Tracker changed from Patch to Feature
- Subject changed from Interface to Improve the UI/UX of the 'issue description edit' feature
- Status changed from New to Needs feedback

Woot! You've reported this exactly a week after the 10th birthday of the initial change¹ that is the root of this issue, that itself has been reported, on a recurring base, many times² over the last decade.

Now, to your report: could you please provide a detailed description of the UI/UX you expect for this feature?

I've modified the subject to be more descriptive and the tracker to match your request.

¹ [r1129](#), which was done in preparation for [#563](#) and [#607](#)
